Please find below and/or attached an Office communication concerning this application or proceeding.

The time period for reply, if any, is set in the attached communication.

Office Action Summary

Application No.

10/583,044

Applicant(s)

FUNAHASHI ET AL.

Examiner

Ryan Robinson

Art Unit

2614

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 06 May 2010.
2a) ☒ This action is **FINAL**. 2b) ☐ This action is non-final.
3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

- 4) ☒ Claim(s) 1-3 is/are pending in the application.
4a) Of the above claim(s) _____ is/are withdrawn from consideration.
5) ☒ Claim(s) 1 is/are allowed.
6) ☒ Claim(s) 2 and 3 is/are rejected.
7) ☐ Claim(s) _____ is/are objected to.
8) ☐ Claim(s) _____ are subject to restriction and/or election requirement.

Application Papers

- 9) ☐ The specification is objected to by the Examiner.
10) ☒ The drawing(s) filed on 15 June 2006 is/are: a) ☒ accepted or b) ☐ objected to by the Examiner.
Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).
Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).
11) ☐ The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

Priority under 35 U.S.C. § 119

- 12) ☒ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
a) ☒ All b) ☐ Some * c) ☐ None of:
1. ☒ Certified copies of the priority documents have been received.
2. ☐ Certified copies of the priority documents have been received in Application No. _____.
3. ☐ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).

* See the attached detailed Office action for a list of the certified copies not received.

Attachment(s)

- 1) ☒ Notice of References Cited (PTO-892)
2) ☐ Notice of Draftsperson's Patent Drawing Review (PTO-948)
3) ☒ Information Disclosure Statement(s) (PTO/GS-08)
Paper No(s)/Mail Date 6/15/2006

- 4) ☐ Interview Summary (PTO-413)
Paper No(s)/Mail Date: _____
5) ☐ Notice of Informal Patent Application
6) ☐ Other: _____

DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 2-3 are rejected under 35 U.S.C. 102(b) as being anticipated by Proni, U.S. Patent No. 6,088,466, published on 7/11/2000, (hereby Proni).

3. As to claim 2, Proni discloses a loudspeaker (Fig. 2b) comprising a frame (20), a magnetic circuit (36b) held by the frame, a voice coil body (43) disposed so as it can move freely in a magnetic gap (45) of the magnetic circuit, a diaphragm (24) whose outer circumferential end is connected to the frame (20) via a first edge, and a suspension holder (38) whose outer circumferential end is connected to the frame (20) via a second edge; and a cylindrical supporting section (53) attached to the voice coil body (43), wherein: a diameter of an inner circumference of the suspension holder (38) is greater than an outer diameter of the voice coil body (43) while a diameter of an inner circumference of the diaphragm (24) is greater than the diameter of the inner circumference of the suspension holder (38), the suspension holder (38) has an inner circumferential portion which is apart from the voice coil body (43), an innermost surface of the inner circumferential portion is disposed on a top surface of the supporting

section (53) and the inner circumferential portion is coupled to the voice coil body via an adhesive (Col. 10, lines 28-32), and the diaphragm (24) is disposed on and in contact with the suspension holder (38) at an inner circumferential end of the suspension holder (38) such that the diaphragm (24) is supported by the suspension holder (38).

4. As to claim 3, Proni discloses a loudspeaker (Fig. 2b) comprising a frame (20), a magnetic circuit (36b) held by the frame, a voice coil body (43) disposed so as it can move freely in a magnetic gap (45) of the magnetic circuit, a diaphragm (24) whose outer circumferential end is connected to the frame (20) via a first edge, and a suspension holder (38) whose outer circumferential end is connected to the frame (20) via a second edge; and a supporting section (53) attached to the voice coil body (43), wherein: a diameter of an inner circumference of the suspension holder (38) is greater than an outer diameter of the voice coil body (43) while a diameter of an inner circumference of the diaphragm (24) is greater than the diameter of the inner circumference of the suspension holder (38), the suspension holder (38) has an inner circumferential portion which is apart from the voice coil body (43), the inner circumferential portion is disposed on a top surface of the supporting section (53) and the inner circumferential portion is coupled via an adhesive to the voice coil body (Col. 10, lines 28-32), the inner circumferential portion extending upwardly from the top surface of the supporting section (53), and the diaphragm (24) is disposed on and in contact with the suspension holder (38) at an inner circumferential end of the

suspension holder (38) such that the diaphragm (24) is supported by the suspension holder (38).

Response to Arguments

5. Applicant's arguments filed on 5/6/2010 have been fully considered but they are not persuasive. As to claim 2, Applicant argues that Proni does not teach that an innermost surface of the inner circumferential portion is disposed on a top surface of the supporting section and is coupled to the voice coil body via an adhesive. Examiner respectfully disagrees. Proni teaches the innermost surface is disposed on a top surface of the supporting section (53). The supporting section has three surfaces: top, bottom, and side. The inner circumferential portion of (38) is shown clearly disposed on a top surface. With respect to claim 3, Applicant argues that Proni does not teach that the inner circumferential portion extends upwardly from the top surface of the supporting section. As best understood by Examiner, "extending upwardly" is interpreted as having a width in a vertical direction, which would be inherent in any physical structure.

Allowable Subject Matter

6. Claim 1 is allowed. The following is an examiner's statement of reasons for allowance: Claim 1 recites the unique feature of the innermost surface of the inner circumferential portion coupled to the voice coil body via only an adhesive.

Conclusion

The prior art made of record

- a. US Patent Number **6,088,466**

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the mailing date of this final action.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Ryan C. Robinson whose telephone number is (571) 270-3956. The examiner can normally be reached on Monday through Friday from 9 am to 5 pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Curtis Kuntz, can be reached on (571) 272-7499. The fax phone number for the organization where this application or proceeding is assigned is (571) 273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see <http://pair-direct.uspto.gov>. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
